Percent Usage of Leasing by Industry Segment

What's the Cost of Money?

- Low Benchmark Rates: USD Libor at less than 0.5%
- Higher Spreads: High Risk Premium & Opportunity Costs
- Borrowing in USD is the Cheapest for Now!
 - Lower USD against most currencies than a few years ago
 - All time low USD Benchmark Rates
 - Watch for USD Availability or Lack of in each country: esp. Korea, Taiwan, China
- Longer Term Borrowings costs a lot more
- Fix Rates are High or Not Available!
- Watch out for Fees Related to Borrowings, Early Repayment Penalties, etc.
- Financial Covenants Constraints – adds to the Cost & Limit on Future Borrowing Cost/Flexibility.

Money Costs isn't Necessary a lot Cheaper than Before!
